AS Citadele banka

Public Financial Information

2nd Quarter 2016

Prepared in accordance with the Financial and Capital Market Commission's regulation No. 145 "Regulations on Preparation of Public Quarterly Reports of Credit Institutions"

LETTER FROM THE MANAGEMENT BOARD

Financial performance

In the first six months of the year, the Group reported a **net profit** of EUR 25.4 million, which was a 70% increase compared to the same period in 2015 when the Group earned EUR 14.9 million. In the reporting period a gain of EUR 11.3 million was recognised on the disposal of Citadele's shares in Visa Europe to Visa Inc. Consequently, the Group achieved excellent profitability ratios: 22.1% ROE and 1.66% ROA (Bank: 19.0% ROE and 1.68% ROA). Even when disregarding the one-time gain, the Group's operating income increased by 9%, reflecting growth in the core business.

Group's **net loan portfolio** increased to EUR 1,231 million (+14% compared to June 2015), with Estonian and Baltic leasing segment portfolios demonstrating the highest growth rates. Thanks to the new business strategy, Citadele's loan portfolio growth was also significantly higher than the banking sector – total loans in Latvia increased by only 2.4% in the first half of 2016, according to Financial and Capital Markets Commission data.

Group's **net interest income** reached EUR 31.1 million (Bank: EUR 23.6 million), which was a 5% increase compared to the same period in 2015. This demonstrated that the Group's strategy to increase the loan portfolio in all key segments in all three home markets – Latvia, Lithuania and Estonia - is yielding results despite an environment of declining market rates and bond yields.

Net commission income for the Group grew by 6% up to EUR 18.3 million (Bank: EUR 13.1 million). The increase was mostly driven by an increase in income from payment transfers as well as payment cards where the Group benefited from strong growth in its merchant business and its customer base.

Group's **administrative expense** increased by 12% when compared to the same period in 2015 (Bank: 14%), which was mostly driven by personnel costs. By the end of June 2016, the number of active employees in the Group increased to 1,666 (Bank: 1,299). The increase was the result of the Group's strategy to further strengthen the sales force and IT teams.

Group's **asset quality** continued to improve. NPL ratio decreased to 9.6% (Bank: 10.0%) compared to 12.0% in June 2015 (Bank: 12.2%). Although net impairment charges increased, Group's cost of risk remained at 1.0% (Bank: 1.2%), which was a similar level to the one seen a year ago.

Group's **liquidity** and **capital position** remained strong: the deposit book grew by 14% compared to the respective period last year, maintaining the loan-to-deposit ratio at prudent 45% level, and the total capital adequacy ratio was 12.5% (Bank: 13.7%), which excludes the profit generated in the first half of 2016.

Developments and Events in Lending

Active lending to SMEs in all three Baltic States, and retail lending in Latvia and Lithuania, shaped the basis of the loan portfolio growth. Growth in the retail and SME sectors reflected Citadele's new strategy to become the primary bank of choice for customers in these segments.

Retail segment Latvia

In the Latvian retail segment the loan portfolio registered a 9% increase year-over-year, with the total loan portfolio increasing by EUR 26 million and reaching EUR 304 million. Central to growth has been speeding up the loan application reviewing periods and developing a new application channel: a web-based credit scoring tool that Citadele introduced in May. The tool invites existing and potential new clients to learn their individual credit capacity. The amount of available consumer lending and individual interest rate is calculated based on data submitted by interested clients via the web form without having to formally register. The ease of use of the web portal and openness in communicating Citadele's proposition resonated well with consumers.

Company segment Latvia

While both SME and Corporate loan portfolios in Latvia continued to grow, the SME segment demonstrated the most rapid growth: a 15% increase year-over-year. In the first half of 2016, Citadele launched a series of "Support Loan" products tailored to a range of industries for SMEs. For example, these new products enabled companies and farmers to receive micro loans of up to EUR 20,000 based on the client's cash flow and waived the requirement for collateral. The offering has enabled Citadele to increase its client base in the micro-SME sub-segment, a segment historically underserved by the market in lending.

Lithuania and Estonia

Growth in lending is also reflected in Citadele's operations in Lithuania and Estonia, where Citadele continued to strengthen its business. In Estonia, the total loan portfolio reached EUR 92 million (a 54% increase, compared to June 2015). In Lithuania the total loan portfolio reached EUR 229 million (a 19% increase, compared to June 2015).

Developments and Events in Innovations

In order to continuously improve Citadele's customer experience and competitiveness of services, the Group is maintaining a steady focus on innovation in customer service and technologies. In addition to introducing a range of micro-loans in the MSME segment and providing an on-demand web-based credit-scoring tool for retail consumers, there were also a number of other innovations in 2016.

Mobile

During 1Q 2016, Citadele invested in developing a brand new mobile application with online-banking functionality. A distinctive feature is a MobileSCAN authorization tool built into the mobile application and linked to a particular device – smartphone or tablet. It enables users to connect to the internet bank by merely entering the user's name, password and PIN code, waiving the need for a separate code card or calculator (which are normally required by banks). Since the beginning of the year, the number of Citadele mobile app users in Latvia has increased by more than 2.5 times.

Branches

In 2016 Citadele continued to invest in refining its approach to the retail branch concept and design. In February Citadele opened a branch office at Skanstes Street, Riga, Latvia that featured a novel concept: the branch is designed with an informal house-like atmosphere. In May, Citadele opened a new branch in Vilnius, Lithuania, jointly with the "Coffee Inn" chain, featuring a cafe and bank on the same premises.

Product design

For retail product design Citadele developed and launched a distinctive fixed-price service bundle offering to new clients in Latvia and Lithuania in order to increase its base of primary-banking clients who use Citadele for their everyday money transfers and card payments. The approach differentiates Citadele's offering from other offers in market.

Awards

Citadele's dedication to growth and continued effort in refining customer service has been recognized by third parties.

Euromoney Awards of Excellence

In June, Citadele was declared "Central and Eastern Europe's Best Bank Transformation" in Euromoney magazine's annual "Euromoney Awards of Excellence". The following is a statement by Euromoney: "Restructured, recapitalised and renewed – Citadele can no longer be seen as the unsuccessful lender which was left over after the influential collapse of Parex. Citadele is now in a good place from which to serve Latvia's economic recovery."

Customer service

In 2016, Citadele received high recognition for its services in Latvia and Lithuania from "Dive", a customer satisfaction research company commissioned to carry out Baltic banking service studies annually. In Lithuania, Citadele was recognized as the best customer service provider among Lithuanian banks, whereas in Latvia Citadele was recognized as the runner-up in terms of the customer service.

Sincerely,

Guntis Beļavskis Chairman of the Management Board

Risk Management

Risk management principles are set out in Group's Risk Management Policy. The Group adheres to the following key risk management principles:

- The Group aims to ensure low risk exposure, diversified asset portfolio, limited risks in financial markets and low level of operational risk;
- The Group aims to ensure an acceptable risk level in all operations. Risks are always assessed in relation to the expected return. Risk exposures that are not acceptable for the Group are avoided, limited or hedged;
- The Group does not assume high or uncontrollable risks irrespective of the return they provide. Risks should be diversified and those risks that are quantifiable should be limited or hedged;
- The Group pursues prudent risk management policy, that is aligned with the Group' business and ensures effective total risk mitigation;
- Risk management is based on awareness of each and every Group's employee about and responsibility for the nature of transactions he/she carries out and related risks;
- Risk limit system and strict controls are essential risk management elements. Control of risk level and compliance with limits is ensured by structured risk limit systems for all material risks.

Risk management is an essential element of the Group's management process and business activities. The aim of risk management in the Group is to facilitate the achievement of the Group's goals, the Group's successful development and long-term financial stability, protecting the Group from unidentified risks. Risk management within the Group is controlled by independent unit – Risk and Compliance Sector.

The Group is exposed to the following main risks: credit risk, market risk, interest rate risk, liquidity risk, currency risk and operational risk. The Group has approved risk management policies for each of these risks, which are briefly summarised below. More detailed information about risk management is available in "Risk management" note of AS Citadele banka annual report, which is published in the Bank's web page's section "Annual reports".

Credit Risk

Credit risk is the risk that the Group will incur a loss from debtor's non-performance or default. The Group is exposed to credit risk in its lending, investing and transaction activities, as well as in respect to the guarantees issued to third parties and other off-balance sheet commitments to third parties.

Credit risk management is based on adequate risk assessment and decision-making. For material risks, risk analysis is conducted by independent unit of Risk and Compliance Sector. The analysis of credit risk comprises evaluation of customer's creditworthiness and collateral and its liquidity. The analysis of creditworthiness of a legal entity includes the analysis of industry, the company, its credit history and its current and forecasted financial position. The analysis of creditworthiness of an individual includes the analysis of the customer's credit history, income and debt-to-income ratio analysis, as well as the analysis of social and demographic factors. In the event of material risks, lending decision is made by the Credit Committee, and further reviewed by the Bank's Management Board. For securities Group analyses factors such as business profile and financial performance of the issuer, credit ratings assigned by international rating agencies, market based indicators such as bond credit spreads and stock performance.

After a loan is issued or a security acquired, customer's financial position and issuers' risk are monitored on a regular basis in order to timely identify potential credit losses.

The Group reviews its loan portfolio and securities portfolio on a regular basis to assess its structure, quality and concentrations, as well as to evaluate the portfolio trends and to control an acceptable credit risk level. The Group takes measures for limiting credit risk concentration by diversifying the portfolio and seting credit risk concentration limits. To limit its credit risk, the Group has set the following concentration limits: individual counterparty and issuer limits, maximum exposure limit linked to a particular risk class of counterparty/issuer, limit for risk weighted exposures in a particular country/sector combination, limit for group of mutually related customers, limit for large risk exposures, limit for the Group's related parties, an industry limit, limit by customer type, loan product, collateral type, intra Group transactions. Control of compliance with credit risk concentration limits, credit risk identification, monitoring and reporting is the responsibility of Risk and Compliance Sector.

Group's derivative exposures relate to short term derivatives that do not expose the Group to material credit risk and none of the derivative exposures are overdue.

Market Risk

Market risk is the risk that the Group will incur a loss as a result of the mark-to-market revaluation of balance sheet and off-balance sheet items caused by changes in market values of financial instruments due to changes in foreign exchange rates, interest rates and other factors.

Position risk of financial instruments is assessed and limits are set by the Group's Investment Committee (GIC). The decisions of GIC are approved by the Bank's Management Board. Market risk is managed by the Group's business units and subsidiaries which can accept market risk in line with the set limits and investment restrictions of

the respective portfolio. Market risk is measured, monitored and risk levels are reported by Risk and Compliance Sector.

The Group manages market risk by developing investment guidelines for every significant portfolio, as well as by setting individual limits to issuers and financial instruments, ensuring that maximum limit volumes are closely linked to the results of risk assessment. The Group puts a large emphasis on concentration risk applying a framework, where limits are set based on risk weighted exposures for every country and sector combination. To assess position risk the Group uses sensitivity analysis and scenario analysis, which identifies and quantifies negative impact of adverse events on portfolio of the Group taking into consideration regional, sector and credit rating profile.

Interest Rate Risk

Interest rate risk is related to the negative impact of interest rate changes on the Group's income and economic value.

Interest rate risk management in the Group is carried out in accordance with Interest rate Risk Management Policy. Interest rate risk is assessed and decisions are made by Assets and Liabilities Management Committee (ALCO). The decisions of ALCO are approved by the Bank's Management Board. ALCO sets the acceptable interest rate risk level and the Group's internal limit system, monitors the compliance with the approved limits and use of the instruments for the management of interest rate risk. Interest rate risk measurement, management and reporting are responsibilities of Treasury Sector, while Risk and Compliance Sector ensures proper oversight and prepares analytical reports to ALCO and the Bank's Management Board.

The Group manages interest rate risk by using the gap analysis of the risk sensitive assets and liabilities, duration analysis and sensitivity analysis of assets and liabilities as well as stress testing of interest rate risk. The Group sets limits for impact of interest rate shock on economic value, net interest income and revaluation reserve. Based on the market analysis and the Group's financing structure, ALCO sets customer deposit interest rates.

Liquidity Risk

Liquidity risk is the risk that the Group will be unable to meet its legal payment obligations. The purpose of liquidity risk management is to ensure the availability of liquid assets sufficient to meet potential obligations.

The Group manages its liquidity risk in accordance with Liquidity Risk Management Policy. Liquidity risk is assessed and decisions are made by ALCO. The decisions of ALCO are approved by the Bank's Management Board. ALCO sets the acceptable liquidity risk level, the Group's internal limit system and defines instruments for the management of liquidity risk, as well as monitors the compliance with the set limits. Daily liquidity management, as well as control is ensured by the Treasury Sector. Liquidity risk management and reporting in the Group is coordinated by the Risk and Compliance Sector.

The Bank evaluates liquidity risk by using scenario analysis. For this purpose several scenarios of Bank's operations under a variety of conditions are developed: gentle crisis (base case scenario), bank's crisis, general market crisis and a combined scenario. The Bank evaluates its liquidity position for each of the scenarios for a variety of periods (ranging from 1 week to 3 months). System of liquidity risk limits and early warning indicators has been implemented in the Bank. The Bank also estimates costs it could suffer under conditions of prolonged liquidity crisis. In addition to scenarios analysis, the Bank also prepares yearly cash flows, which incorporate assumptions about the most likely flows of funds. For general assessment of asset and liability gaps the Bank regularly prepares and analyses liquidity term structure.

Liquidity risk for the Group is assessed for each significant currency that the Group transacs. Liquidity risk limits are reviewed at least once a year depending on changes of the Group's operations or external factors with sgnificant impact. A liquidity contingency plan has been developed and is updated on a regular basis.

The Group's balance sheet structure is planned for at least a one-year period and is aligned with actual business development plans. The major current and potential sources of liquidity are regularly analysed and controlled across the Group.

In the reporting period the Bank was in compliance with liquidity ratio requirements and met mandatory reserve requirements in the Bank of Latvia.

Currency Risk

Currency risk is a risk of loss arising from fluctuations in currency exchange rates.

Currency risk management in the Group is carried out in accordance with Currency Risk Management Policy. Currency risk is assessed and decisions on limits set are made by the Financial Market and Counterparty Committee (FMCC). The decisions of FMCC are approved by the Bank's Management Board. FMCC defines the acceptable currency risk level and the Group's internal limit system, as well as monitors compliance with these limits.

Day-to-day currency risk management is the responsibility of Treasury Sector, while risk monitoring and reporting is the responsibility of Risk and Compliance Sector. The Group has set a limit for open currency positions in each currency at 10% of its equity, and the limit for the total open currency position at 20% of its equity. The limits are in compliance with the requirements of Latvian legislation. To enhance its capacity to measure and control the exposure to foreign exchange risk the Group takes advantage of several widely applied methodologies: value at risk, expected shortfall and scenario analysis.

Operational Risk

The Group has adopted the Basel definition of operational risk: the probability to incur losses due to failure or partial failure of internal processes to comply with the requirements of the laws and binding external regulations, as well as the requirements of internal regulations, due to the acts of the Group's employees and operation of systems, irregularities in internal processes, as well as due to the acts of third parties or other external conditions.

Further operational risk is divided in the following categories: personnel risk, process risk, IT and system risk, external risk.

Operational risk is managed by integrated and comprehensive framework of policies, methodologies, procedures, and regulations for identification, analysis, mitigation, control and reporting of operational risk have been implemented. Operational risk management is an indispensable part of the day-to-day management process and is binding to all Group participants, process, product and service owners, structural units, their heads and employees in their daily operations in line with their specific features. The Group's target is to ensure that each employee knows not just how to perform a specific transaction, but also understands the justification of the use of the specific mode of performance.

The purpose of operational risk management system is to maintain possibly low level of economically justified risk facilitating the sustainability of the Group's performance and business profit in the long-term.

The Group does not accept operational risks with potential impact exceeding 10% of the Group's net annual revenues and with probability of occurrence at least once per ten years or risks with unquantifiable impact which are unmanageable, irrespective of the financial gains this could bring (i.e., the Group does not perform business activities incurring such operational risks).

The Group applies following approaches for operational risk management:

- Operational risk assessment in development projects new and updated services and products are introduced only after a thorough risk assessment has been carried out;
- Regular operational risk-control self-assessment identification and assessment of potential operational risk events, assessment of the control systems in place and analysis of the necessary risk reduction measures:
- Determining operational risk indicators usage of statistical, financial, and other indicators, which represent the level of operational risk in variable activities of the Group;
- Operational risk measurement, analysis, monitoring, reporting and escalation registering and analysing operational risk events, severity of these events, causes, and other important information in operational risk loss and incident database;
- Scenario analysis and stress testing;
- Business Continuity planning regular Business Impact Analysis is carried out and Disaster Recovery plan is implemented.

Operational risk management in the Group is carried out in accordance with Operational Risk Management Policy.
